# Anti-Seep Collars 🇺🇸

## Keep your pipe from being washed out.

- The Anti-Seep Collar works with any smoothwall pipe or corrugated plastic tubing.
- $1/16$" gum rubber.
- Easy to install.
- Tan floating stock has superior resilience, elongation, and tear strength.
- Resistant to water, most salts, mild acids, and many other chemicals.
- Wood frame.
- Economical to buy.

### Anti-Seep Flanges— $1/16$" Gum Rubber with Wood Frame

ASC02 .....................2' x 2'
ASC03 .....................3' x 3'
ASC04 .....................4' x 4'
ASC05 .....................5' x 5'
ASC06 .....................6' x 6'

## Recommended Anti-Seep Collar

| Pipe Size | Item# |
|---|---|
| 3" | ASC02 |
| 4", 5", 6", 8", 10", 12" | ASC03 |
| 15", 18", 24" | ASC04 |
| 30", 36" | ASC05 |
| 42", 48", 60" | ASC06 |

# Directions for Using The Anti-Seep Collar

1. Unroll the Anti-Seep Collar and align the boards to form a square. Attach metal brackets to the corner of the boards with the screws provided. Attach the rubber to the frame with the nails provided.

2. **\*IMPORTANT—Cut a round hole** in the center of the rubber that is smaller than the pipe size (approx. 33% smaller). This will allow the rubber to stretch over the pipe when the Anti-Seep Collar is installed on the pipe. This will provide a tight seal between the pipe and the Anti-Seep Collar.

   **\*Cutting an "X" or slit will cause the rubber to tear.**

3. Slip the pipe through the Anti-Seep Collar, inspect the seal between the pipe and the Anti-Seep Collar, carefully backfill, and compact with suitable soil.

**CAUTION:** Excessive compaction or downward pressure on wooden frame will cause rubber to stretch and distort resulting in loss of seal between rubber and pipe.

*Water Flow*
