LKB SERIES

BOX BEAM LEVEL

SOLA FOCUS 20% Magnification Vial

Keson Box Beam Features

Heavy profile weight

Two material end caps

Single Measuring Surface

Tension Wedge vial mount in method

Vial Features

Greater Contrast and 20% magnification

Superior fluid

Anti-static
Extreme temperature ranges

Anti-shock action

Luminous Strip

Benefits

Ensures heavy usage (and accidental abuse) does not compromise the performance of the level

Protect the level from damage due to drops

Highest accuracy and best user experience. Users are cued to which surface to use with a single milled surface

Self-compensates for temperature changes
Among the two best methods for mounting vials within a level profile

Benefits

Easier to see the bubble and determine its position, for faster measurement

Ensures you can work in any environment without interruption

Bubble is unaffected by electricity
Bubble is unaffected by too cold or too hot temps

Bubble retains its integrity or returns to its shape more readily

Allows visibility in low light conditions
